

# IFEANYI ONYEKWERE

Detail-oriented, organized, and meticulous Node JS developer with a demonstrated ability to work efficiently and meet up with project deadlines. A dedicated team player with a positive and enthusiastic attitude, committed to contributing to a company's success.

## EXPERIENCE

### Decagon, Nigeria

#### Associate Software Engineer

JULY 2022 - Present

- Proficient in Javascript/Typescript ecosystem for scalable and high-performance applications.
- Implemented a robust RESTful API infrastructure for an artisans-client application, optimizing performance and scalability, resulting in a 50% reduction in response time and enabling the application to handle more current users.
- Improve code quality and maintainability through testing and code reviews, reducing software bugs.
- Proficient in SQL and No-SQL databases, optimizing data storage and retrieval for enhanced system performance.
- Pioneered the implementation of Agile methodologies, specifically SCRUM, to streamline application development processes.
- Project Management Tools: Employed Jira, Slack, and other project management tools to streamline workflows.
- Version Control: Implemented Git for efficient collaboration and on-time project delivery.

### Drury Chemicals, Ogun

#### Process Engineer

JANUARY 2020 - JUNE 2022

- Optimized chemical processes with a focus on efficiency and safety, resulting in significant achievements, cost savings, and process improvements
- Collaborated cross-functionally to implement process changes while ensuring compliance with industry regulations and safety standards
- Conducted experiments and analyzed data to identify root causes of process deviations and implement corrective actions
- Provided training and guidance to junior engineers, enhancing team efficiency and knowledge sharing.
